

Trained

Place labels decide what counts

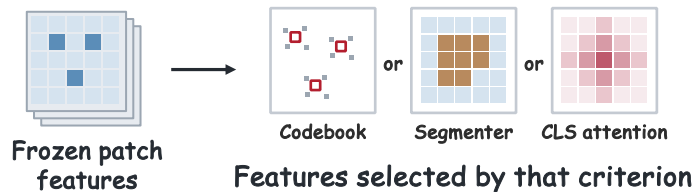

Standard Strong where labels come from (93.0)
Cross-env. Drops with the imagery (65.1)

Training-free, prior work

An external criterion decides what counts

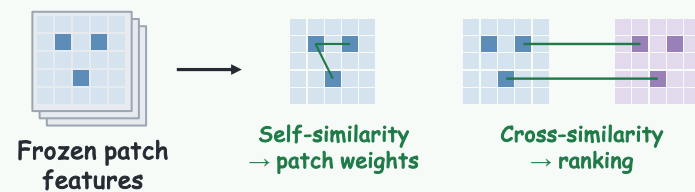

Standard Criterion not tuned to places (80.3)
Cross-env. Criterion may not transfer (69.5)

Ours

The patches themselves decide what counts

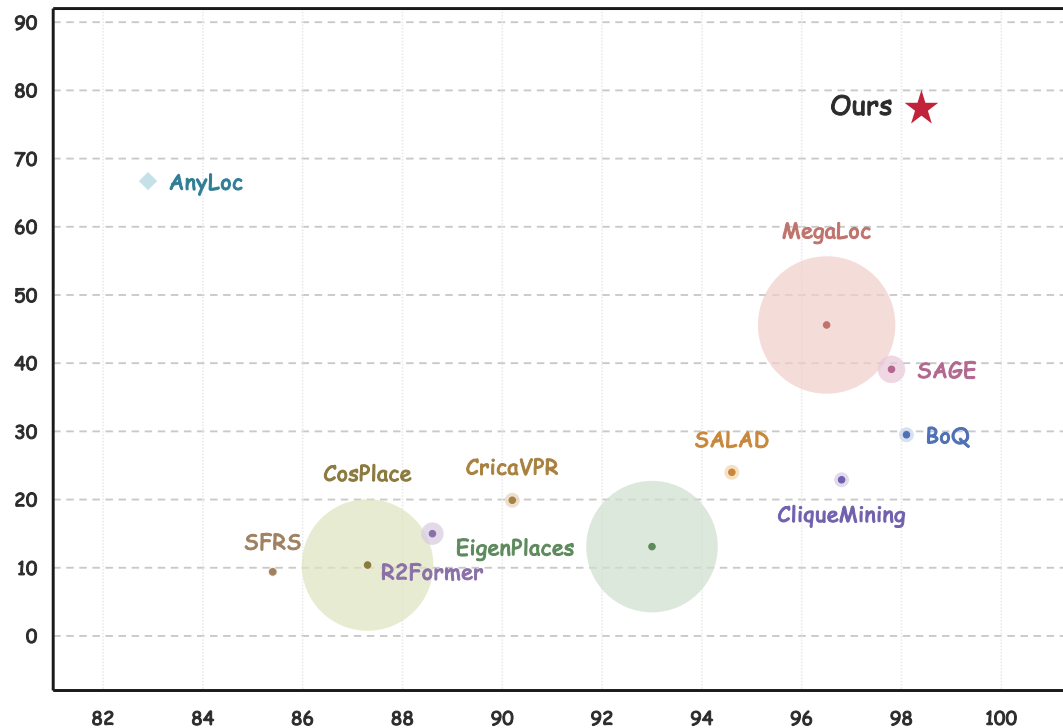

Standard On par with trained (93.3)
Cross-env. Best by 11 points (76.6)

Training cost vs. cross-environment recall

VP-Air R@1 (cross-environment, %)

Tokyo 24/7 R@1 (standard, %)
disc area: labelled training images

Recall@1 on all 17 benchmarks

standard · cross-environment
