

Trained

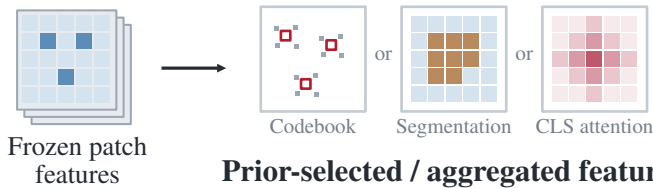

Place labels decide what counts

ID	Strong within-domain discrimination
OOD	Can inherit training-domain bias

Training-free, prior work

Added criteria decide what counts

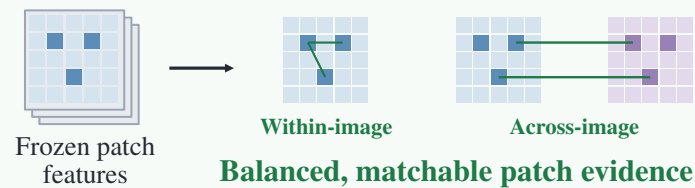

ID	Selection $\neq$ place discrimination
OOD	Selection criteria may not transfer

ID / OOD: within / outside the labelled VPR training domain.

Ours

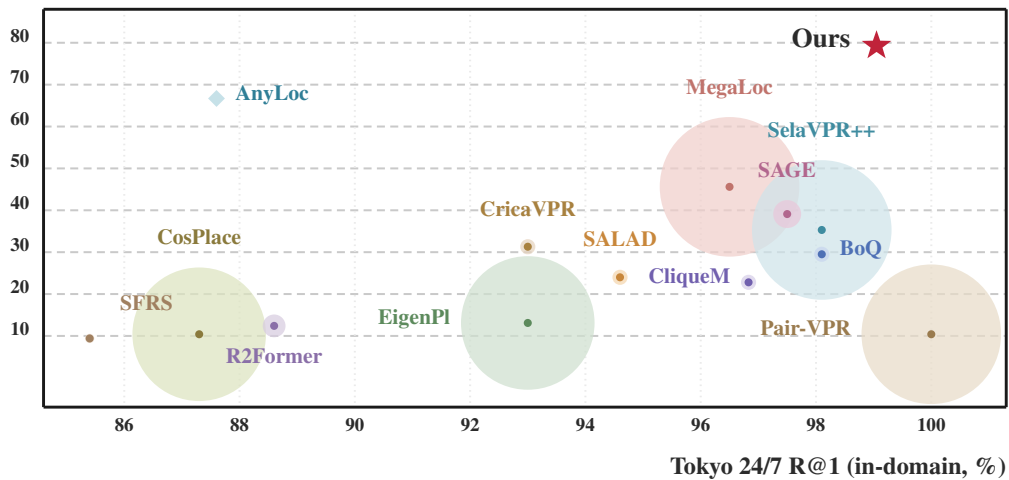

Let patches decide what counts

ID	Match distinctive local evidence
OOD	Strong cross-environment retrieval

Supervision cost vs. OOD recall

VP-Air R@1 (out-of-distribution, %)

★ ours (training-free) ♦ training-free ● trained ● 1 million images ● 5 million images

Recall across 14 benchmarks
